Updates from ABC (Area-based Coordination)

- Meeting held in Ankara on 20 Oct: **RCO, ABC co-chairs and donors**: to share gaps and **funding needs for winterization** in Turkiye EQ response
- ABC shared an **inter-sector winterization strategy**. Has been shared with active partners
- ESMAT has carried out a **joint-needs assessment** through KIIs in the former Adiyaman TAC. Data analysis ongoing and more details to follow
- Next week, an **ABC meeting** will take place with authorities in **Kahramanmaras** with a focus on winterization needs and gaps

Additional Updates

- Shelter Sector hosted a half-day **NEAT+ training** for Sector members on 20th October. 14 attendees participated from 9 organizations.
Facilitated by Charles Kelly from the Global Shelter Cluster Green Team
- **Activity info reporting tool** has been revised: orientation held -32 participants from 17 organizations. Please contact IM: Fida if you missed out on the orientation
 - Includes *when* (planned, ongoing, completed) and *who* (composition of targeted HHs including vulnerabilities).
 - Also includes winterization interventions.
 - We encourage partners to utilize the planned tool in order to effectively coordinate winterization assistance and avoid duplication

Partners who provided shelter and NFI assistance in the last three months (August-October) according to Activity Info

DTM and ESMAT: Neighbourhood-level
Site Mapping Round 3 Findings: Shelter Focused
(not for publication, shared with Shelter Sector partners by email)

WINTERIZATION COORDINATION

Winterization Coordination

- Shelter Sector had a preliminary winterization coordination meeting on 23 October to share existing response capacity and gaps
- Winterization assistance approaches
 1. Formal site-level coverage in response to government requests
 2. Planned assistance to clusters in neighbourhoods
 3. Complemented by neighbourhood approach to address emerging referrals
- The next ad-hoc winterization coordination meeting will take place between 13-17 November. In the meanwhile, please update Shelter Sector on your winterization capacity and programs

Recap: Shelter Gaps identified by authorities

Malatya

Beydagi site: 2000 containers need roof reinforcement (sloping roofs, not just plastic sheets due to snow weight); 2000 plastic sheets (4x8); **500 oil heaters**

AFAD: **1000 heaters**, and **reinforcement of containers in rural areas** (27K people residing in 6770 containers in rural areas – 3878 foldable)

Insulation of pipes from freezing

Animal shelters for winter – 1000 tents

K.Maras

In rural areas, 15,400 containers distributed, of which, **13,150 are foldable and require reinforcement**. All foldable containers in Maras are in rural areas.

Need for communal space reported – lack of **warm gathering spaces**

Authorities indicate on-going assessments on flood risk no needs anticipated for drainage. Requests for plastic sheeting have been addressed for most formal sites, as well as heater stocks reported by AFAD- **some requests in rural sites (Afsin, Goksun, Elbistan)**

Recap: Shelter Gaps identified by authorities

Adiyaman

11,370 foldable containers upgrade
16,000 plastic sheets (4x8m) to cover the roofs of the containers; (4000 provided out of 20,000)

Winterization/rehabilitation of 6 different container cities including construction of **drainage and other light infrastructure works** around communal spaces (total area 15,000 m2)

1,500 electric radiators (mainly targeting communities living in **foldable containers**);

Hatay

13,159 foldable containers require upgrades

4x8 roof tarpaulin for protection from rain

HH level drainage in sites

1370 heaters + 12,384 blankets

Urgent requests **for winter clothes** (following up for quantity)

AFAD request **full coverage of a site** to limit community tensions

Response Capacity shared by Partners: Updated

- 97 Referrals in October. Needs mainly around tarpaulin, heaters, winter clothing
- Most referrals from Adiyaman
- • No response to referrals so far. Caritas Turkiye will support with some heater referrals in Hatay. TRC will support with addressing some referrals for heaters and winter clothing in Adiyaman.
- Partners requested to preposition and let Sector know capacity to address referrals
- **Shelter Sector to develop a rapid referrals verification template by next week**

HUB COORDINATION UPDATES

Operational Coordination | Hub updates | Kahramanmaras

Key updates | 31 October 2023

55 container cities - 23,232 Containers - 66,383 indiv. - TAC hosting 14,000 SuTP. (from the last 2 weeks)

14,000 foldable containers in rural areas

- 2 informal Tented sites, 131 indiv.
A cluster of 10 tents (34 indiv.) Turkish citizens – a cluster of 19 tents (97 indiv.) Refugees occupying both clusters in Beyoglu area.
- It is estimated by local authorities **that container sites will stay for at least 3 years.**
- TRC in Kahramanmaras is planning to implement shelter improvement activities in 6 different container cities. These are **Airport, Memiskahya, Yukaripazarcik, Umutkent, Koc, and NEF Kilavuzlu Container City.** Plan to distribute , tarpaulins, blankets, electric heaters, silicone sealant. For Airport Container City, TRC is planning to improve the lighting system of container cities.

Operational Coordination | Hub updates | Kahramanmaraş

Key updates | 31 October 2023

TRC update:

- planning to distribute 210 plastic sheets at the Galatasaray site within this week.
- Both electrical and sewage system infrastructure are too weak at the site

TSS:

- A new tender has been initiated for Snow Kit for Afsin, Elbistan, and Turkoglu. The kit contains a snow shovel, brush, 5 packages of 25kg salt, gloves, raincoat, and lighting equipment.
- There is an ongoing activity to establish a communal space at Necip Fazil area.

Operational Coordination | Hub updates | Malatya

Key updates | 24 October 2023

73 Container cities – 28,328 containers – 29,909 HH - 111,809 indiv.

6,770 containers in rural areas – 26,788 individuals (last month - 6,534 containers in rural areas 25,917 individuals)

- 2 New container cities will open within 15 days Karayollari & Kore. Capacity of both sites has not been shared.
- 2300 individuals are waiting to be relocated to new container cities. No information on where they are currently living
- Due to the use of electric heaters in tents and containers throughout Malatya, the electrical infrastructure becomes insufficient and there are many power outages. AFAD is in communication with TEIAS for the improvement of the infrastructure.

Operational Coordination | Needs Referrals | Malatya

Key updates | 24 October 2023

TSS Update:

- There are 8 clusters with 10 or more families. 3 of these clusters consist of containers (type not known). AFAD has stated that these families will be relocated to new sites and receive AFAD containers, thus it is expected that informal areas will decrease further.
- Winter intervention is needed in informal and rural areas due to different needs such as heating, water flow in containers, insulation of pipes, and power outages.

AFAD winterization solution option: curved roof over the container as a solution to protect the container from snow load.

Operational Coordination | Hub updates | Adiyaman

Key updates | 27 October 2023

55 Container cities – 23,163 containers – 19,320 HH - 66,128 Indiv.

Rural: 11,370 Containers (foldable) – 42,593 indiv.

- In coordination with the local authorities in Former Adiyaman TAC site, ESMAT carried out a an intersectoral needs assessment – Shelter Sector participated in preparing the assessment and focused on:
 - Shelter Security (locks, partitions etc..)
 - Access to safe cooking
 - Access to electricity
 - NFI needs

Next Meeting: on Tuesday, 7th November at 13:30 | Online only

Operational Coordination | Hub updates | Hatay

Key updates | 26 October 2023

166 Container cities – 24,000 Containers - > 200,000 indiv.

5 Tented sites

13,159 Foldable Containers

- As there is no stable electricity in Hatay. Need more clarity on electricity cuts in container cities and informal sites.
- The numbers of foldable containers in sites:
 - Uzumdali has 3180 containers none of them are occupied yet.
 - Reyhanli 162 containers
 - Bahcelievler 206 containers site is occupied by 1040 individuals.
 - Opet site 540 containers is occupied by 1775 individuals.
 - Alsancak site 190 containers is occupied by 800 individuals.
 - Atis Alani 100 containers

Operational Coordination | Hub updates | Hatay

Key updates | 26 October 2023

- Uzumdali site construction is well underway and the number of installed foldable containers is increasing.
- Local authorities confirmed that people will be relocated from tents to Uzumdali site in mid-December.
- WHH Pilot: upon AFAD's request, the pilot applied to one container using a 6x4m tarp and roof tapes.

Shelter Sector observation: People are already changing the electrical wiring inside the containers by themselves to be able to use their heaters – Bahcelievler and Alsancak

A white building with windows
Description automatically generated

Operational Coordination | Hub updates | Hatay

Key updates | 26 October 2023

Requests from local authorities:

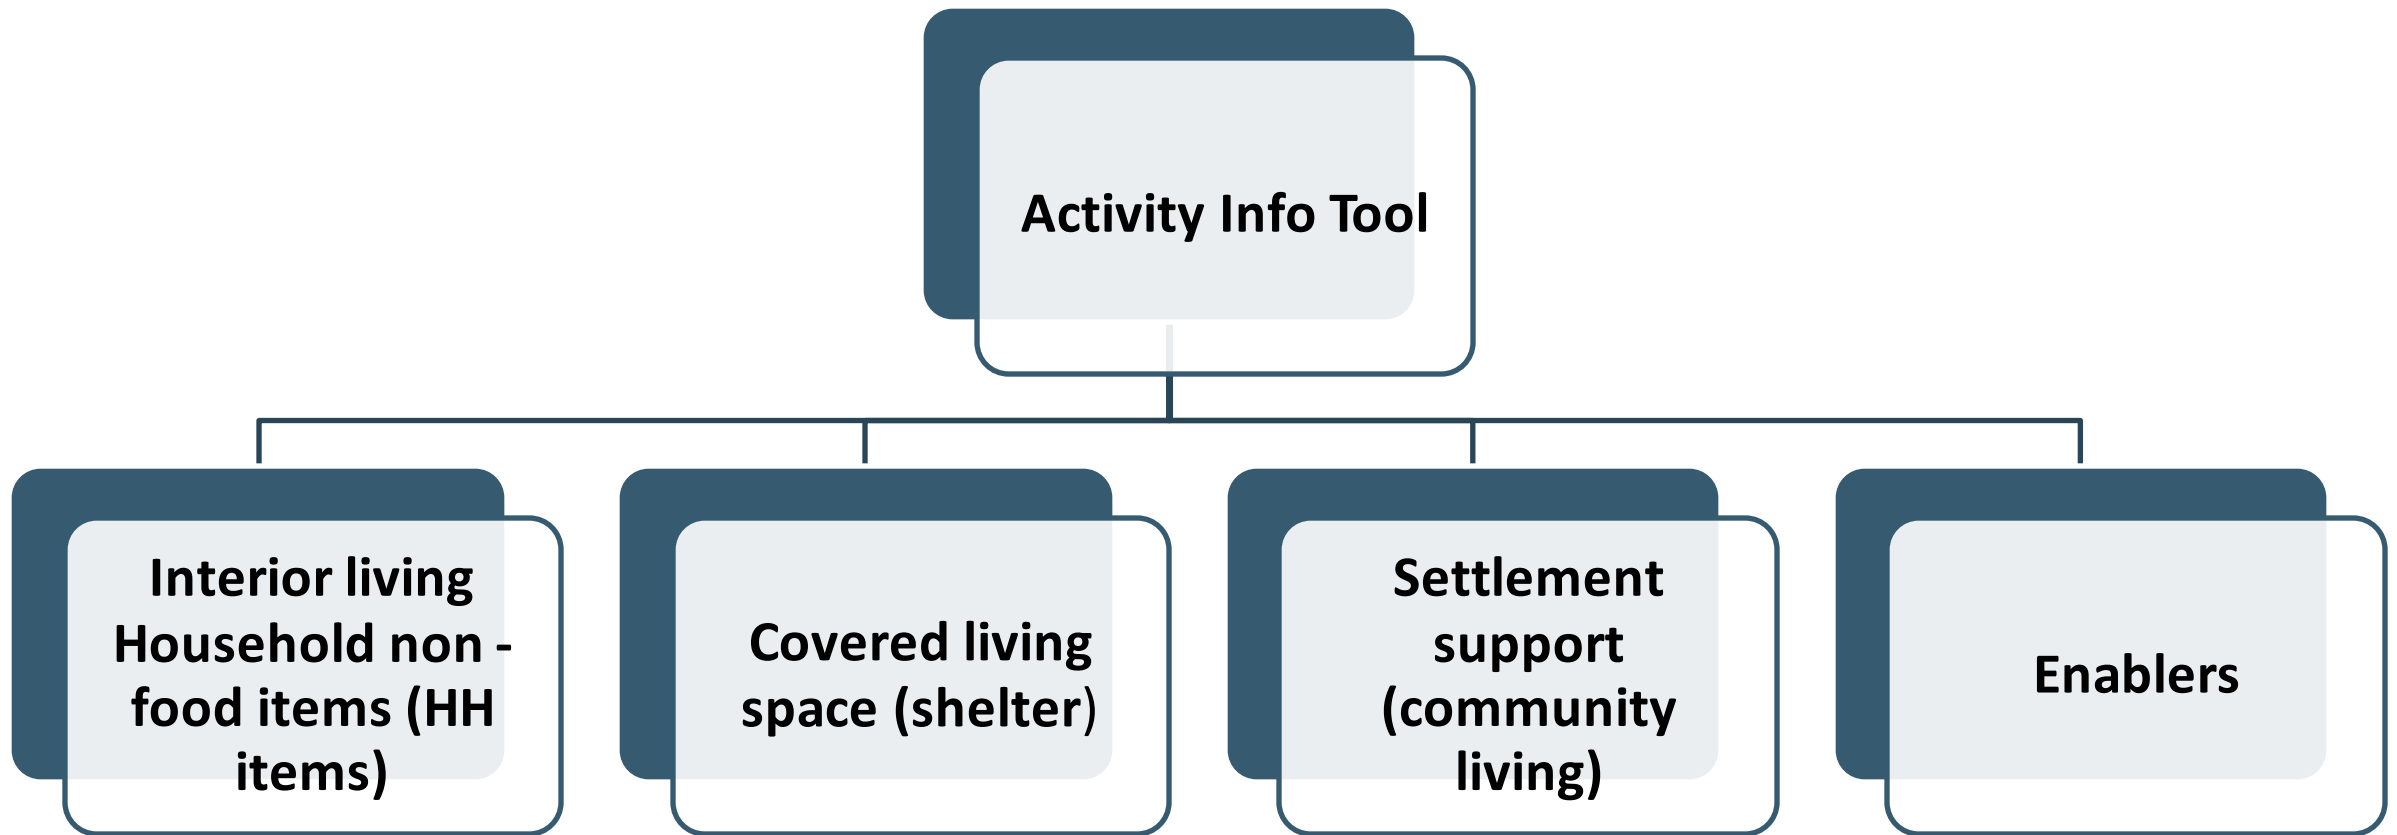

- Furniture for the containers
- Heaters (Electric oil radiators)
- Tarps and insulation kits (roof tape, silicon sealant)
- Winter clothes
- Rehabilitation of Parks
- Gravels for the foldable container sites in Kirikhan

Activityinfo reporting is on the 5th of each month

Only 4 partners reported for the month of September. October reporting deadline is on 6 November

Please contact the Sector IM focal point, Fida, with any questions at sheltersectorim1.tur@ifrc.org or fida.ozkok@ifrc.org

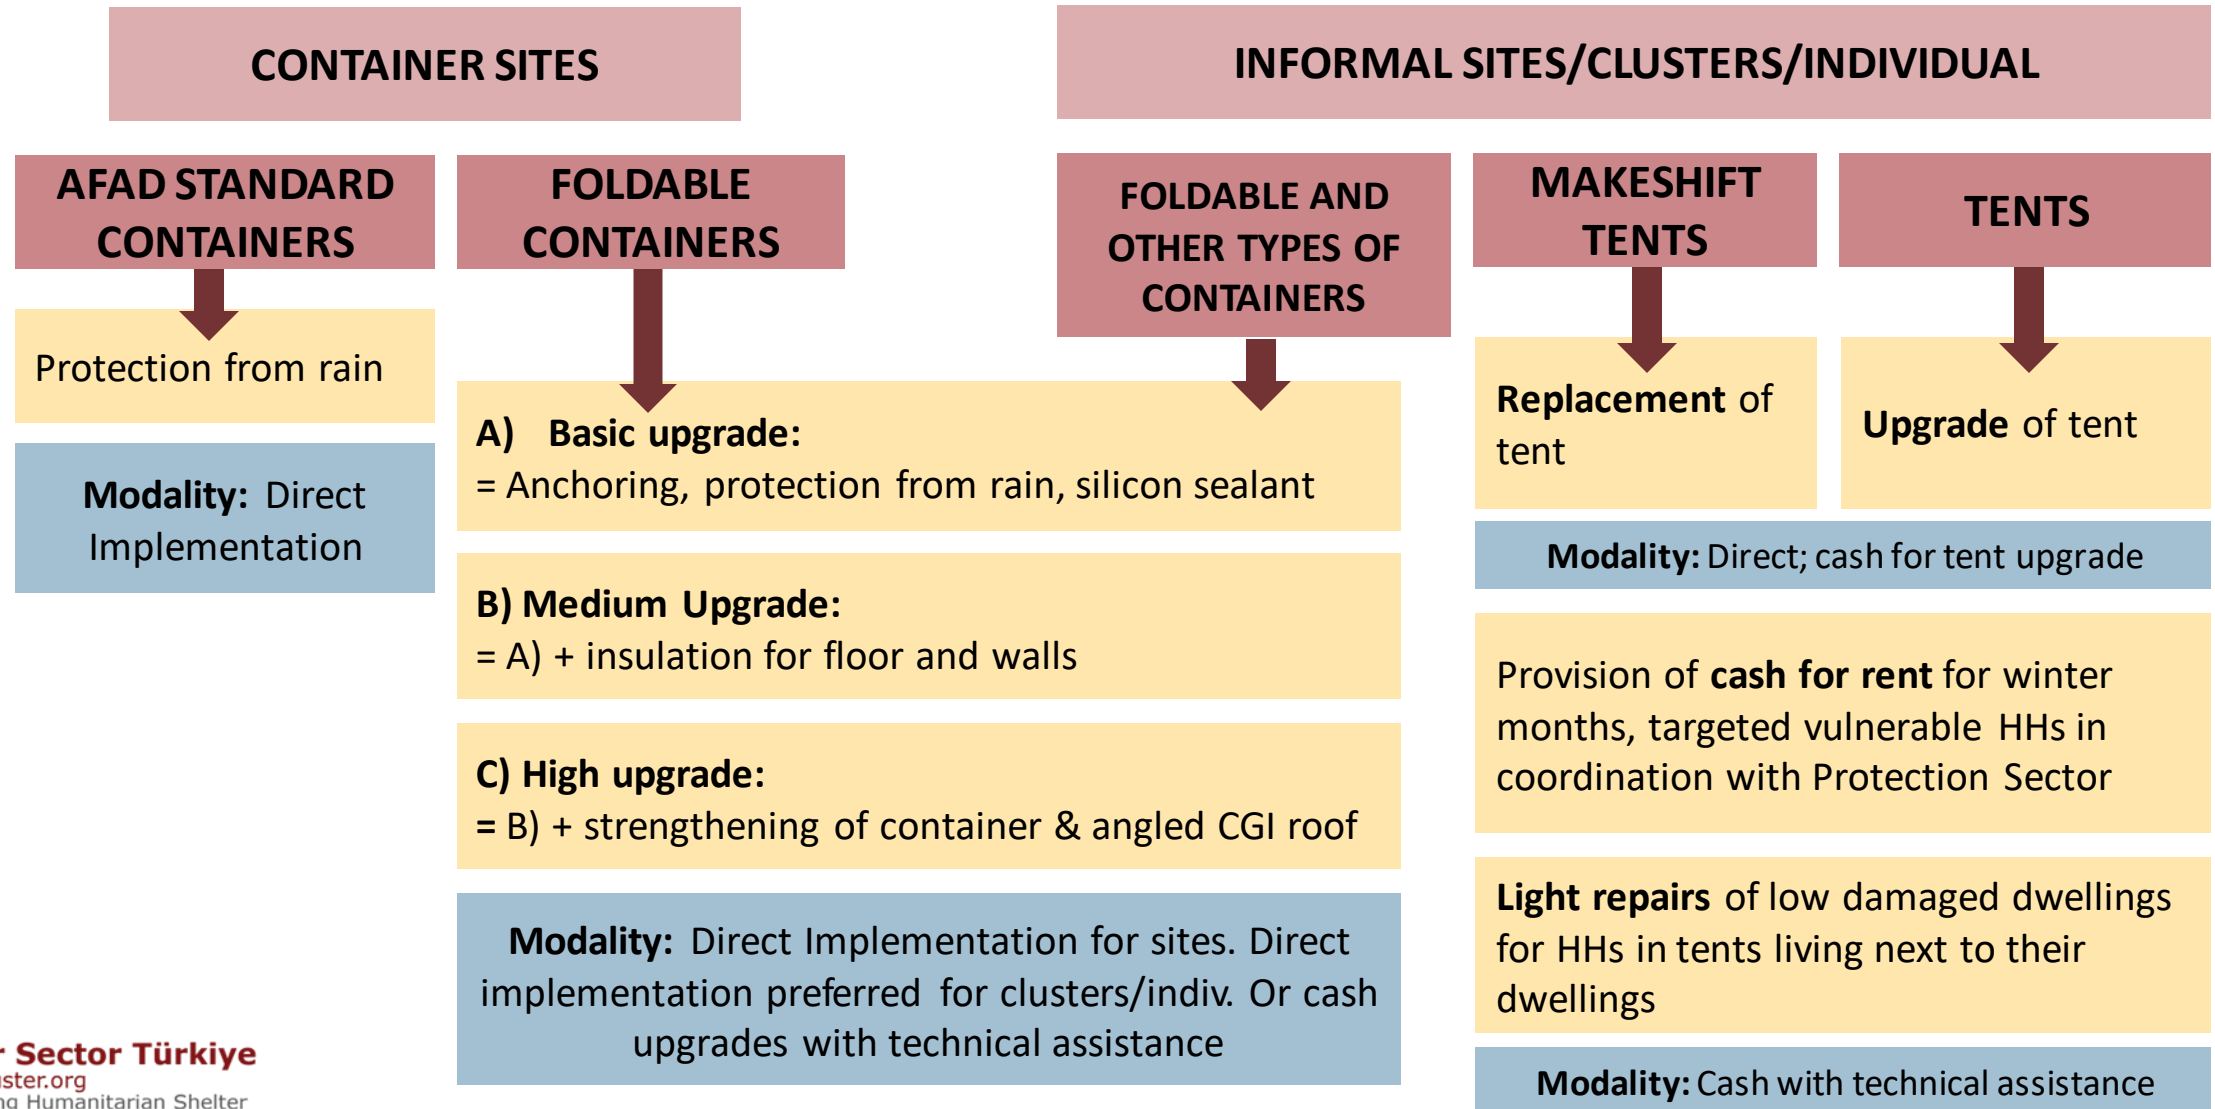

Technical Coordination | Shelter TWG Updates

- Recommendations for container upgrades shared with TWG
 - Direct implementation preferred, especially for anchoring
- Heater distribution: need for safe electric heaters for containers/tents
- Tarpaulin procurement: received very expensive quotes for tarps
 - Partners looking for other suppliers
 - Sector checking global stocks
- Request partners to update the Cost Comparison Sheet
- Snow kits: who is distributing? Sand vs Salt?

Last Week: A technical meeting regarding the foldable container pilots was held between shelter partners, Shelter Sector, and AFAD authorities in Malatya.

SHELTER ASSISTANCE FOR WINTERIZATION

Prioritizing HHs living in precarious temporary shelters as their primary accommodation

Technical Coordination I Shelter TWG Updates

- Light Repair TWG meeting will take place this Friday (3/11/23) at 9:00am. Most of the meeting will be in Turkish.
- Agenda:
 - HLP challenges and security of tenure – Legal Protection Officer Presenting
 - Issues with Labor availability
 - Fluctuation in Market prices
 - Use of Vouchers or Cash
 - Targeting beneficiaries

Partners updates: UNHCR, Young Life Foundation, YUVA, ACTED
