

maars LIVING WALLS®

halo®

endless design configurations, outstanding acoustics

At Maars we focus on sustainability, reusability and future-oriented designs for work environments where people feel comfortable and can perform at their best. It's from this mindset that we continuously develop our solutions further. We offer an inspiring concept of remountable, integrated wall solutions for healthcare, office buildings, airports, education, hospitality, industry, retail and more.

The most visionary architects and dealers worldwide choose Maars. They have seen us as the supplier of innovative wall solutions for over 75 years, solutions that contribute to the productivity and wellbeing of employees and that are distinctive thanks to their sustainable and circular nature.

Our solutions feature warm colours, they excite, change their appearance flexibly, and create the most wonderful acoustics. They stimulate your imagination and foster higher performance. With our solutions, we aim to surprise and inspire people by providing a unique visual experience, optimal comfort, wellbeing, security and privacy. Sustainable, environmentally friendly and with Cradle to Cradle certification.

Welcome to the world of Maars!

halo®

modular

halo®

5/20

Sustainability and circularity are crucial for Maars Living Walls. Modular construction and re-use are the rule, and this goes for our Halo office pod as well. This solution offers key environmental benefits and provides incredible flexibility. Thanks to Halo's modular design and the use of smart prefab cassettes for installation, the pods can easily be expanded to two or four-person versions. The individual components are also interchangeable with all Maars walls. In short, Halo is the last word in circularity.

take control

Which configuration is best for your work environment? With Halo you make the decisions. Do you want one or more glazed walls? Or perhaps you prefer solid walls? The choice is entirely yours.

recycle

privacy

high-end design, perfect dimensions

Working in open plan offices is the norm these days. But a phone call or video meeting requires silence, focus and privacy. Thanks to the high-end design and unsurpassed acoustic performance, our Halo office pod offers all of this and does so in style. Its outstanding features make Halo a unique, flexible workspace where you can concentrate and work undisturbed or meet in a quiet setting. And it's also easy to move if necessary.

Halo has everything you need, and you can configure it completely according to your needs and wishes. You design it just the way you want it. And with its optimal internal dimensions, Halo feels spacious and comfortable, despite its compact size. This makes Halo the perfect solution for any dynamic work environment.

- flexibility through modularity
- ultimate in acoustic performance
- unrivalled freedom in design

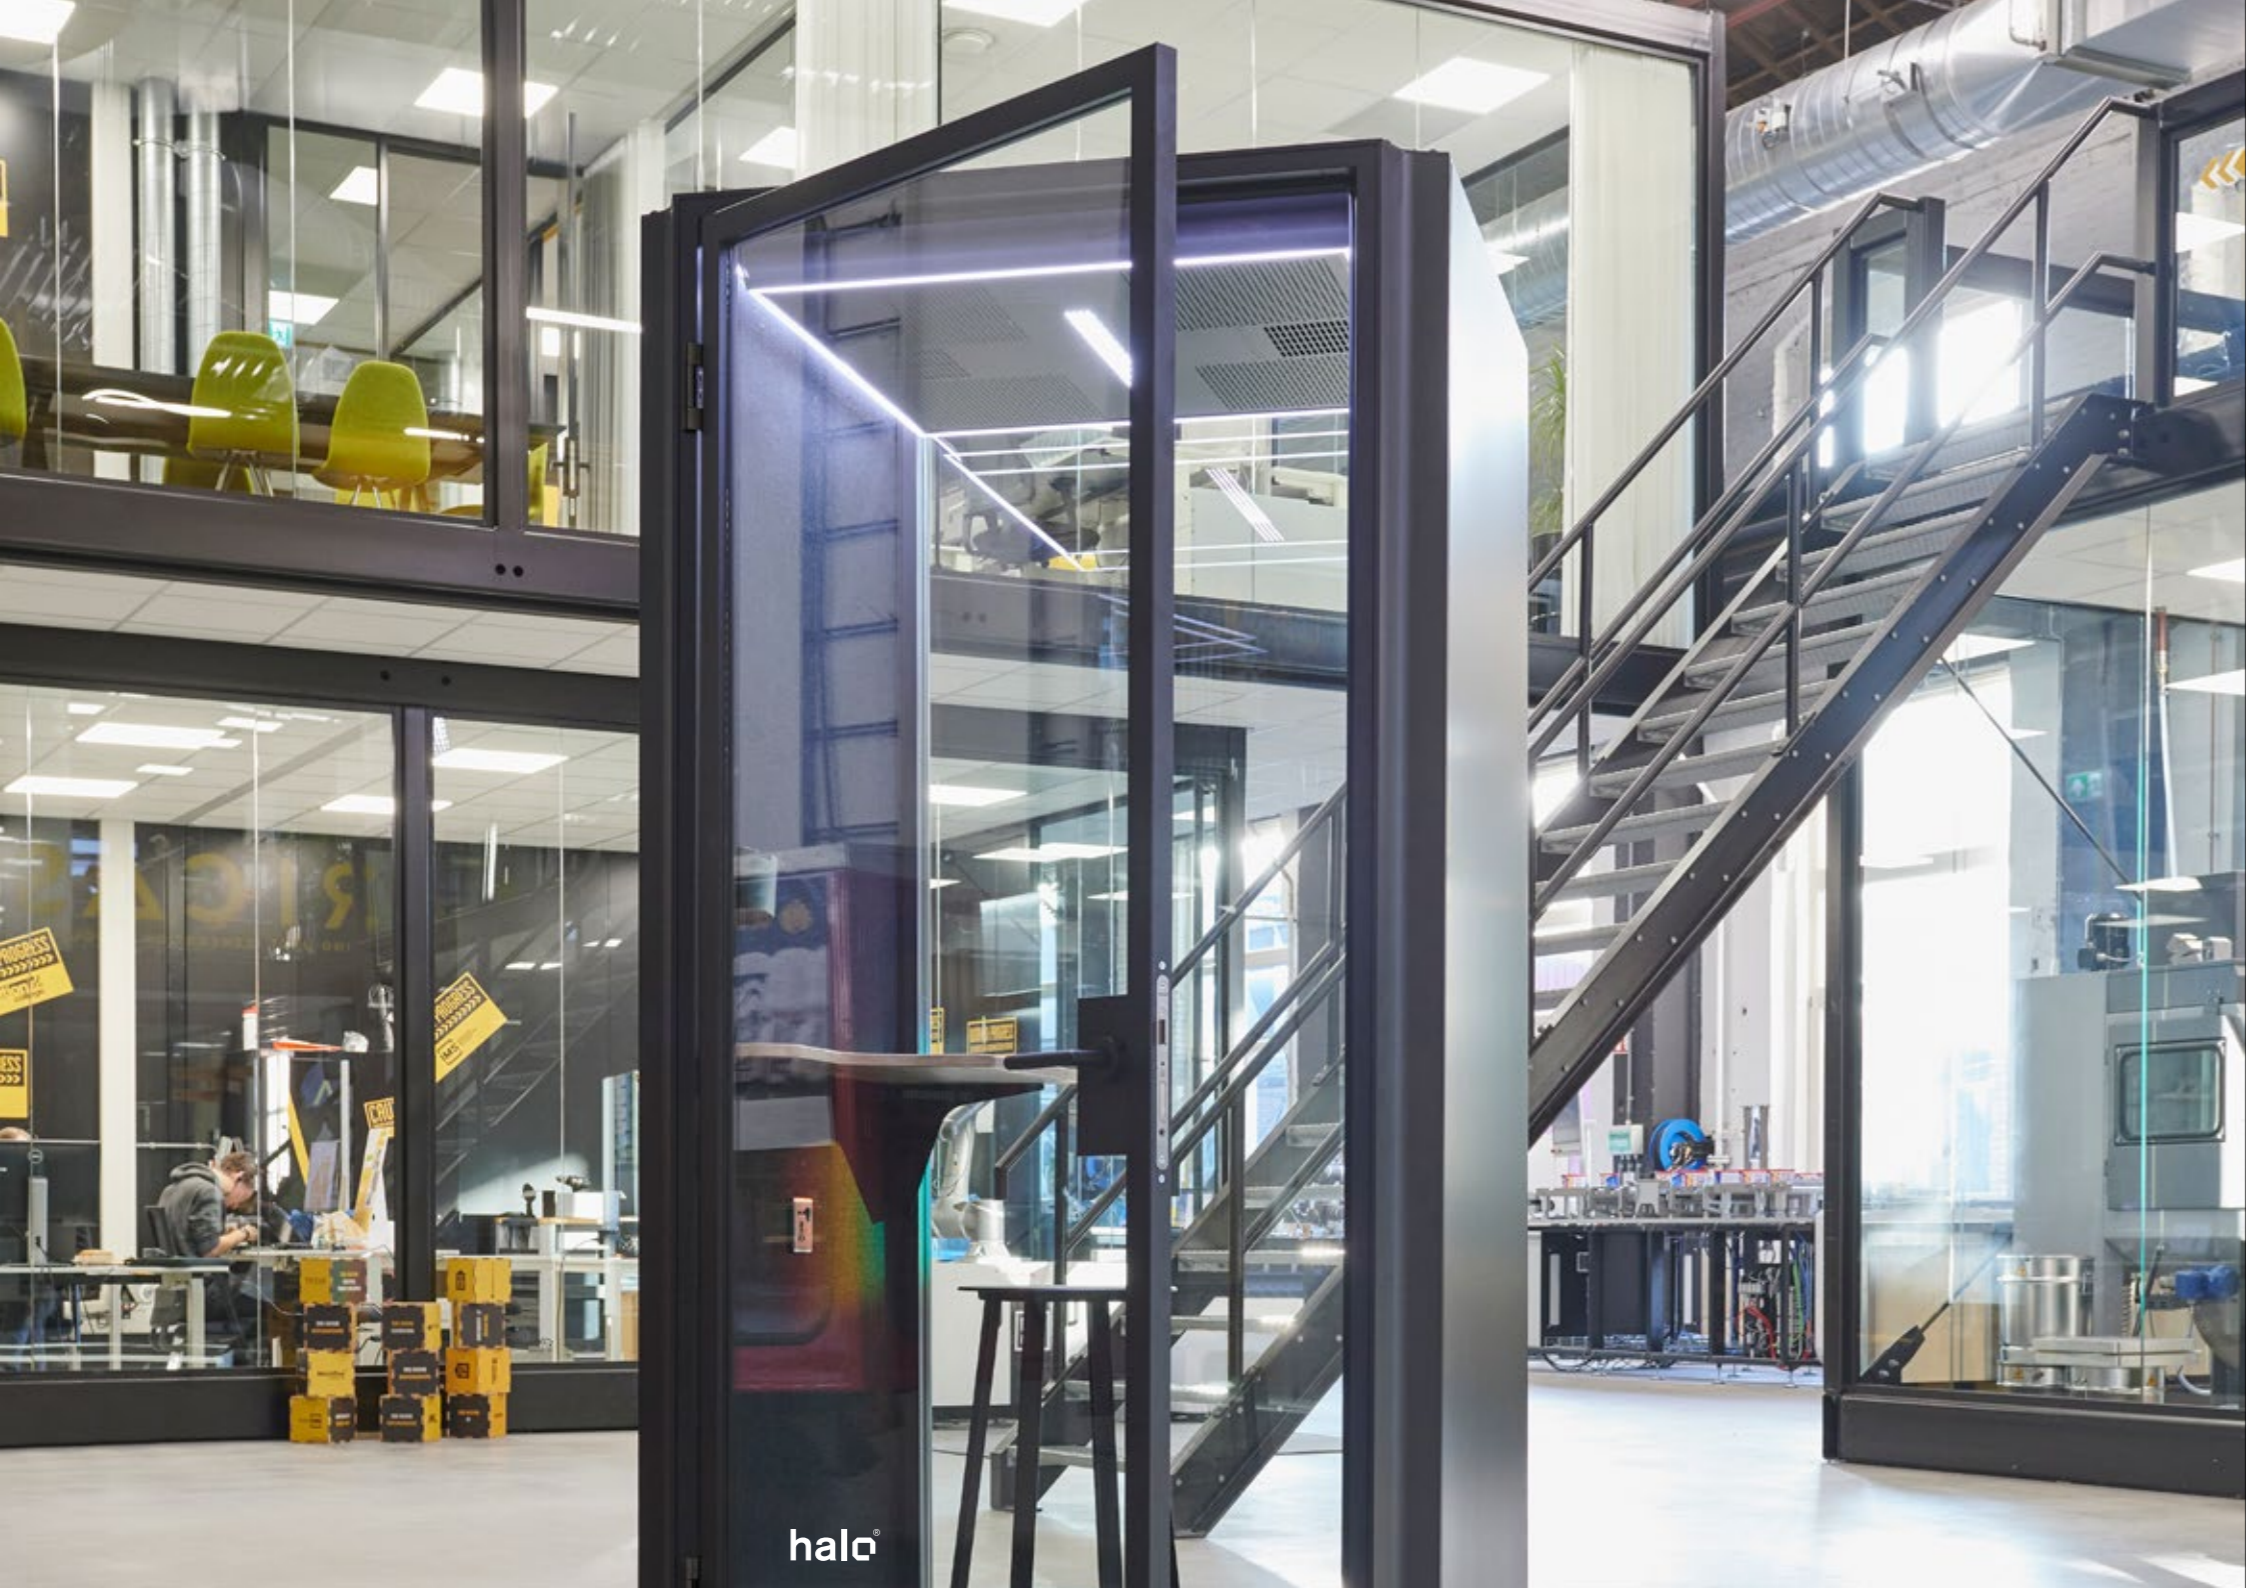

custom wall design: choose the colour and finish you want

The Halo office pod is the ultimate in design and can be assembled entirely according to your wishes. The pod is available with or without a floor. What makes Halo really stand out in the market is that you are not tied to anything in terms of design. Have the walls in a RAL colour and finish of your choosing. Fabric wall finish? Whiteboard walls? One or more glazed walls? No problem! Create your own unique Halo pod – completely in the style you want and in harmony with your work environment and/or corporate identity.

flexible

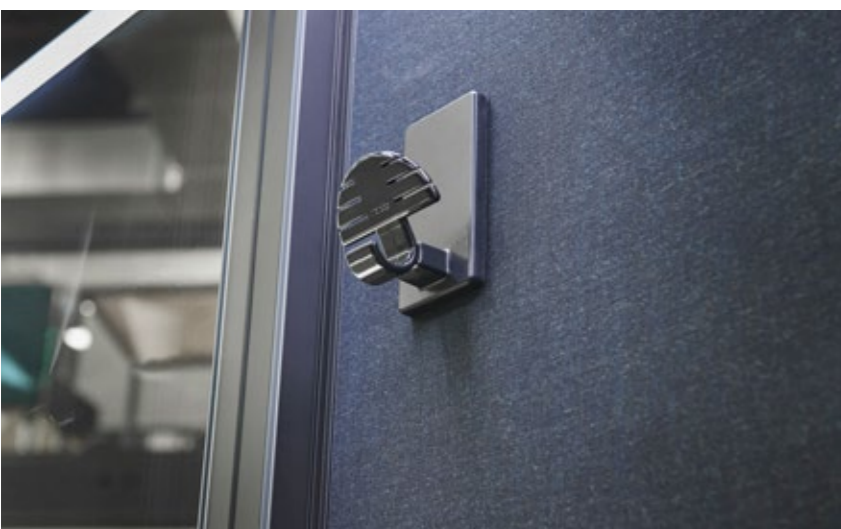

halo®

outstanding acoustics

We paid a lot of attention to acoustics while developing Halo. It's a crucial aspect after all, given that acoustics make a substantial contribution to the living and working comfort in the Halo office pod. At Maars we have a great deal of know-how and experience when it comes to acoustics. Our R&D department works with its own test lab, and our wall solutions are tested and certified externally as well. This means we are able to offer high-quality acoustic performance for Halo too.

We are proud that Halo offers the ultimate in acoustic performance, up to Class A according to ISO 23351-1. Thanks to the use of ultra-high-quality materials, the Halo office pod is a unique place that keeps the sound where it belongs and creates an acoustic oasis, even in noisy workplaces.

halo®

features & benefits

- Endless design configurations
- Ultimate acoustic performance: up to Class A according to ISO 23351-1
- Fast and efficient installation thanks to prefab cassette system
- Optimal internal dimensions: 1036 x 1036 x 2200mm
- Integrated LED lighting and ventilation system
- Durable and remountable, reusable elements and C2C-certified steel and glazing
- Easy to move

easy does it

The Halo office pod comes as a very complete work space. The prefab cassette system makes the installation of the pod extremely efficient, with two of our people installing the pod on site in two hours or less. And we've thought of every amenity too.

Halo comes with:

- Solid, powder-coated doors
- Glazed door with or without slim profile
- Perforated steel ceiling
- Optional floor + carpet tiles
- Integrated motion detector, LED lighting and ventilation system
- Power and USB connection
- Height adjustable desktop

■ Integrated LED lighting

■ Integrated ventilation system

■ Glazed door with or without slim profile

■ Ultimate in acoustic performance

■ Endless design configurations

need more Halo?

If you need more Halo work space now or in the near future, the modular design of the Halo office pod makes it easy to expand to the two or four-person version.

nesting efficiency

From one to two or four or more: create as many Halo workplaces as you need. Halo's modularity gives you the freedom to efficiently combine several Halo office pods and create your own internal architecture.

more room-in-room solutions

The way we work and collaborate has changed significantly. And with today's open office spaces we need to reassess how to arrange our work environment. That's why, in addition to our Halo office pod, we offer two additional innovative room-in-room solutions, also for larger groups of more than 20 people: the Core and the lineaCube. When you choose our high-end lineaCube you opt for the very best in acoustic and aesthetic performance.

committed to circularity

For Maars, the well-being of people in any space is essential. We are always looking for sustainable, responsible solutions and we are constantly researching new production techniques. Reduce, reuse and recycle are firmly rooted in our business philosophy, from eco-friendly coatings to carbon offsets and the 5S Lean Manufacturing methodology. Our products help improve your BREEAM and LEED scores. We have established an integrated operational management system that

we apply to all critical quality, environmental and health & safety processes, giving us full control over our quality, environmental and health & safety policies. By scrutinising the entire production process, we can be more efficient in our production while reducing energy consumption. Maars' ongoing commitment to innovation and circularity has been recognised with a Cradle to Cradle™ Bronze certificate* for all our wall systems and with ISO-9001 / ISO-14001 certification.
