# How does it work?

The HeatMe Pro keeps you warm all the time with a mix of modern heating technology and smart design.

A ceramic heating element turns electrical energy into heat, which is how the gadget works.

This part heats up quickly and starts to give off infrared heat, which is then spread evenly throughout the room.

The air around the space absorbs the heat, warming it up without drying it out or making hot places that are uncomfortable.

Because **HeatMe Pro** is small, it can focus the heat right where it's needed, providing quick and precise warmth.

To keep people safe, HeatMe Pro has a feature that turns it off automatically if it gets too hot.

#### How to Use It?

**Plug into a Standard Outlet:** To use the device right away, just plug it into a power outlet.

**Set the Temperature You Want:** Change the settings to a temperature that is comfortable for you.

**Use the Timer:** To decide how long you use it, set the timer for anywhere from 1 to 12 hours.

**Make Sure It Has Enough Airflow:** Put the device somewhere where it can get enough airflow to work well.
