

Just Add Water

Malmsten

the Company with Water Experience

The swimming pool – a place for exercise, well-being and organized activities. Our goal at Malmsten is to assist our clients in creating beautiful, profitable and well-running aquatic facilities. Malmsten's focus is to provide products and services that tie in with aquatics activities, water and swimming. Experience with water increases safety!

Products

Our extended range includes stainless steel pool equipment, movable floors, gratings, lane lines, diving boards, water slides, etc.

Some of our products are manufactured and/or designed in house, others are purchased from leading manufacturers, all made from the highest quality materials. Most of our products are manufactured in Sweden, which is an advantage when it comes to service and spare parts.

Services and Consulting

We have the possibility of offering consulting on new products or refurbishments of existing swimming pools.

With over 50 years of experience in swimming and equipment for aquatics centres, we have a broad expertise and the resources necessary to create attractive and efficient swimming facilities. We can also propose ideas and valuable advice on how to make good swimming pools even better.

Make us your creative partner.

Ballarat Aquatic Centre, Australien, 2018

Järfälla. Malmsten supplied pool equipment, such as gratings, turnboards, starting blocks, lane lines, wall anchors, ladders, field of play and goals for water polo. The pool is equipped with a Malmsten Movable Floor with a bridge that can be separated into two. Malmsten is Official DURAFLEX distributor and certified installer.

World Class Swedish-built Products

We have made sure to be at the forefront when it comes to utilising technology and development, whether it is our own products or what we purchase from leading manufacturers. Linus, our advanced robot, controls the assembly of our lane lines in Åhus for example. Today there is Malmsten equipment in pools and water parks all around the world.

Malmsten is Official Supplier for WORLD AQUATICS (formerly FINA) since 2009, LEN Aquatics since 1999 and PanAm Aquatics since 2022 providing competition equipment for international events. Malmsten equipment is in the pools at all major European and international competitions such as the European Championships, the World Championships and the Olympic Games.

Wave-reducing Lane Lines

Malmsten lane line, our premier export product, has been the official event lane line at ten Olympic Games and a great number of European and World Championships. The lane line is assembled and delivered from Åhus.

Water Slides

Kanab Water Slides from our subsidiary HydroSport in Gävle are found in water parks in Europe, Africa and Asia. The slides are manufactured by Ockelbo Plastindustrier AB, a company in the Malmsten Group.

OP Gratings®

Our OP Gratings®, can be found in more than 900 pools, both in Sweden and abroad, for example around the 2004 Olympic pool in Athens. Our gratings are manufactured in our factory in Åhus.

Kristianstad Badrike - Sweden - Malmsten Movable Floor Advanced model

Water Polo

We can offer a complete professional water polo range. The field consists of wave-reducing lane lines with Malmsten's floating goals, ball release and catwalk for judges and officials. Official equipment for international competitions.

Stainless Pool Equipment

Our assortment of stainless steel equipment includes ladders, lane line trolleys, embedded equipment (wall/floor anchors), starting blocks, lane line anchors, etc.

Movable Floors

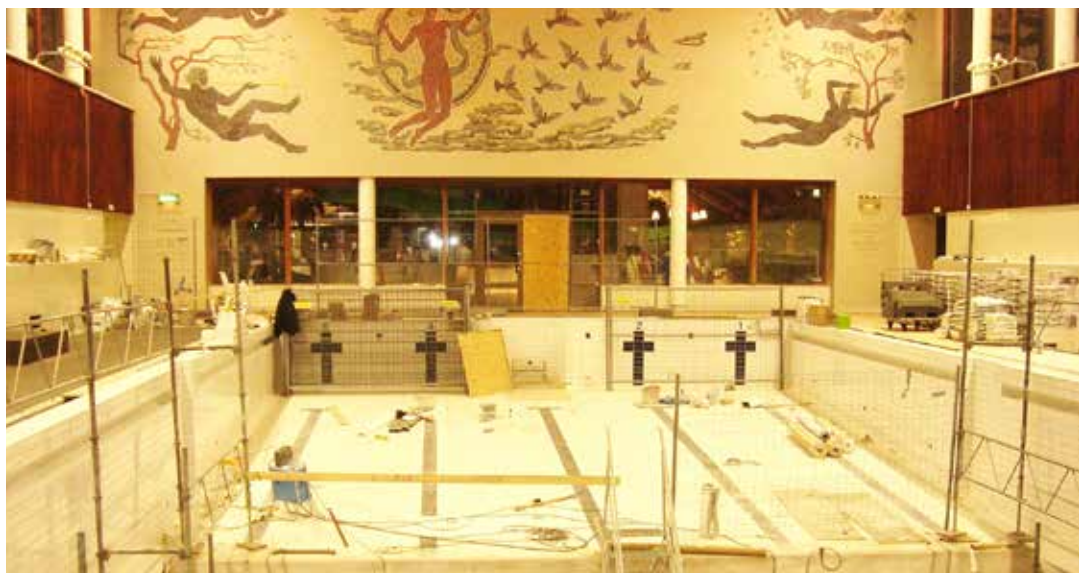

Malmsten manufactures and exports two models of movable floors, Classic and Advanced. Movable floors make it possible to use the same pool for a wide range of activities. Our movable floors can be installed either in new or existing pools.

Mirena Pool Liner

Mirena uses a method where a pool is covered with a PVC liner from the inside. The liner is hot air welded with an overlap, sealing the pool completely. Mirena pool liners are a cost-effective alternative and are found in more than 250 public pools in Sweden.

Renovation of Trelleborg's old pool. The old, 25-meter pool has been fitted with new Mirena pool covers, while the bathing facility is equipped with a 12-meter Myrtha basin in stainless steel. (The Aurora and the Winds mosaic created by Hugo Gehlin in 1942-43 in the background).

①

①

②

③

① Access for everyone! The Malmsten Hall is an innovative concept for a smaller swimming facility model. It will make it possible for municipalities especially, and swim clubs to create good conditions for swimming schools and training by means of their own swimming pool. The goal is to create a turnkey, affordable, easy-care and complete swimming facility at a low cost without compromising on safety and basic technical qualities. An economical and sustainable alternative!

② Malmsten with a passion for diving has been selling, installing and servicing Duraflex products since the 1980s. We have extensive knowledge and a certified installation team ready to discuss your diving pool needs.

③ Backstroke Starting Device from Colorado Time Systems, today's world leader in timing for swimming. The wedge-shaped footrest automatically rolls up upon start. Malmsten is the general agent for CTS in Sweden.

Good Ideas, Clever Solutions and a Strong Will to always deliver the best

Malmsten is increasingly engaged as a turnkey contractor for various projects. With many years of experience, we have the knowledge and resources that are necessary to finalise complete swimming facilities. This is because we have chosen to work together with niche specialists in various fields, such as water purification and the manufacturing of stainless steel equipment and water slides. A form of collaboration that promotes sensible, holistic solutions.

Malmsten was a turnkey contractor in the renovation of the Kantarellbadet in 2018. The former 50-meter pool has been given an extension in life through new pool lining and conversion into four new pools:

- Eight 25-meter exercise / racing lanes with 1.1 - 1.8-meter depth
- A teaching pool measuring 12.5 x 8 meters, with water depth of 0.8 - 1.1 meter
- A family pool measuring 12 x 17 meters that slopes along the entire pool length to a depth of 1.1 meter.
- A small children's pool, which turns into a splash pad and play area of 3 x 6 meters with 0.3 meter water depth.

④ Gustavsviksbadet in Örebro, Water Slides supplied by HydroSport: four slides and starting platform.

⑤ Järfällabadet, multifunctional pool. Two pools in one; a movable two-parts bridge makes it possible to divide the pool as desired for different activities.

⑥ Kristianstad Badrike, Sweden. In the newly built swimming pool, there are three pools with Malmsten Advanced Movable Floors. Stairs and Movable Platform in niche.

Companies in the Malmsten Group

Malmsten has acquired a number of company acquisitions in recent years to strengthen its position as a total supplier.

- **Sweden HydroSport AB** - company wholly owned by Malmsten since 1997 delivering water slides all over the world.
- **Ockelbo Plastindustrier AB** - company wholly owned by Sweden HydroSport AB that manufactures fibreglass water slides.
- **Malmsten Entreprenad AB** - wholly owned subsidiary that implements our swimming pool projects in Sweden. Consulting partner and helpful in designing/ executing new construction and renovation of swimming pools.
- **Mirena Badprodukter AB** - wholly owned subsidiary that manufactures and installs pool lining and covers.
- **Swimtec AB** - jointly owned water purification company in Kungsbacka.
- **Temahallen AB** - jointly owned company that manufactures steel structures.
- **Malmsten Inc** - American Malmsten owned company in Phoenix from which lane lines and water polo equipment are shipped to swim clubs and competitions in North and South America.

Our Guiding Principles World Class Swimming Pools

We create a safe and sustainable environment for learning, well-being and competition

We believe in

Quality

Our philosophy at Malmsten is to be the leading supplier of swimming pool equipment with the highest quality standards at competitive prices. We also want to offer the best service and consulting.

We are very aware that a chain is no stronger than its weakest link, so we put great effort into achieving the highest quality and safety in all components that are part of our products and deliveries.

Long Term Relations

Our goal has always been to build long-term relationships with our clients and distributors, since this develops strong business ties and encourages timely deliveries. We use the approach that every new business venture will develop into a meaningful long-term business relationship. The best advertising for us is satisfied customers who choose to continue doing business with us. We want our partners to know that we take full responsibility, today and in the future.

Summer Olympic Games - Tokyo 2020

Engagement and Passion

With a background in aquatic sports, swimming has always been dear to our hearts

Malmsten is Official Supplier for WORLD AQUATICS (formerly FINA) since 2009, LEN Aquatics since 1999 and PanAm Aquatics since 2022 providing competition equipment for international events. Malmsten equipment is in the pools at all major European and international competitions such as the European Championships, the World Championships and the Olympic Games.

We also have many years of cooperation with the Swedish Swimming Federation and in 2018, 2019, 2021 and 2022, we were the main sponsor of Swim Open Powered by Malmsten, Sweden's only international major competition with over 1000 participants from 30 countries. We are also the main sponsor for the competition in 2023.

Malmsten

a Proud History of Innovation

Our History

Malmsten was founded in 1974 by Tommy and Margareta Malmsten, at that time selling strength training gear and swimming goggles. Having his roots in competitive swimming, Tommy saw the industry's needs. Today, our wide range covers virtually everything needed for new construction, renovation and operation of a swimming pool.

Malmsten is both a manufacturing and a commercial enterprise.

About Us

We believe in long-term relations with employees, clients and suppliers. Our goal is to provide you with the best service regardless of whether you choose standard products or unique design solutions with custom manufacturing - all at competitive prices.

Our Environmental Consciousness Sustainability and Responsibility

Our environmental policy means that we strive to work for sustainable development at all levels. "The closer the better" is our motto. We choose local partners and suppliers as much as possible.

As a part of our environmental strategy, most of our production is located in Sweden. Racing lane lines, water slides, gratings, movable floors, stainless steel equipment, pool toys, and much more are made locally to minimize transportation and to optimize control and flexibility of the manufacturing process.

This means more efficient logistics while we are able to be flexible and control the production. In cases where we have chosen to purchase a product from a country outside the EU, we have used help from

Business Sweden (e.g., the Export Council) to choose an acceptable supplier with work environment and quality that meet our standards.

By recycling and reusing materials and by using packaging and other materials that can be recycled, the natural resources are preserved better.

Today we have solar panels installed on the roofs of the office and our warehouse buildings in order to become partially self-sufficient in energy.
