

Environmental Policy

Malmsten AB's environmental view is to continually strive for ourselves and our stakeholders to be given the opportunity for sustainable operations in order to protect the habitat in the short and long term.

Specifically, this policy means:

- to produce products and services that are resource-efficient with the least possible negative impact on the environment
- that we comply with applicable environmental legislation and other requirements
- that we environmentally adapt the operations at all levels
- that we strive to meet our customers' and society's expectations and demands for our products' life cycle and environmental adaptation
- that we provide our customers with products and services that help them to steer towards an ecological society

Marcus Malmsten
