

## Take-up Reel - replacement part Lane Lines

Art. No. 1011018

Each Original Malmsten Lane Line is sold fully assembled, complete with a Take-Up Reel on one end and a Tension Spring on the other end.

It is an important part on the lane lines used for perfecting the pool installation for competition and training.

The Take-Up Reels function is to adjust the tension of the steel wire. This ensures efficient rotation of the wave breaking discs.

The Take-Up Reel must be adjusted with the original Ratchet Wrench, any other tool may permanently damage the take-up reel. With a separate Ratchet Wrench only authorized personnel may adjust the lane line.

### Advantages:

- Adjusting lane tension properly with ergonomic ratchet wrench
- Ergonomic design, easy to handle with improved thumb/release lever
