

Pool Ladder Model AA

Art. No. 2012002

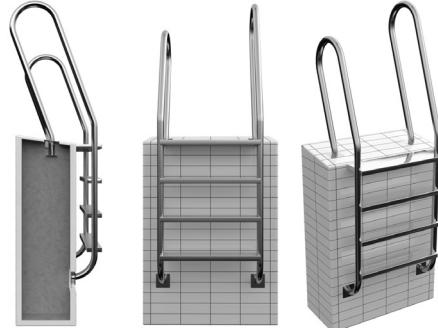

Model AA – Standard Pool Ladder

The Model AA pool ladder is crafted from high-quality stainless, acid-resistant steel (EN 1.4404/316L) for exceptional durability and corrosion resistance. It features Ø 40 x 2 mm tubes and patterned, sandblasted non-slip steps for maximum safety and comfort.

The ladder is mounted on the pool wall using a wall anchor 2010002 and on the floor with either floor anchor 2010028 (angled at 8°) or floor anchor 2010020 (for level floors), allowing for easy removal when needed. For permanent installations, the ladder can be secured to the pool floor using bolts and washers.

Options:

- Available from 2 steps and up
- Standard configuration: 4–6 steps

Product Information

Material: Stainless acid-resistant steel, grade EN 1.4404/316L

Width: 600 mm

Note: All potential equalization requirements and any associated recesses or clearances necessary to eliminate unintended electronic currents (micro-currents) will be discussed and finalized during the design phase. **Delivery time:** Approx. 6 weeks

Advantages:

- Stainless acid-resistant steel for maximum durability
- Non-slip steps and stable construction
- Ladder can be manufactured for permanent installation
- Long service life
- High resistance to corrosion

Selected When it Counts
