

Rough-Tex 2-Ply Anti-Slip Surface

Art. No. 1112010, 1112011, 1112012

Rough-Tex is the preferred slip-resistant surface for tower and platform diving structures and other high-traffic areas at aquatic facilities. It is recognized as the best on the market and is used worldwide as a coating for diving platforms.

Rough-Tex is made of an industrial rubber compound that provides high strength and flexibility. The nylon backing is both stretch and moisture-resistant.

The 2-Ply Black Rough-Tex has a thickness of 6.5 mm. The black color is more comfortable to the eyes of coaches and divers, especially under the bright sunshine outdoors or the bright lights of a world-class indoor pool.

Features:

- World-class quality
- Suitable for indoor and outdoor use
- Easily fitted using any number of contact adhesives
- Available in different widths
