

Cart for Stop Net, Lockable

Art.No. 1514016

Water Polo Stop Net

Art.No. 1514012

A stop net's function is to hinder, for example water polo balls from going onto pool deck, onto public or into a different section of the swimming pool.

This sturdy cart is easily movable and can be used both indoors and outdoors. It is equipped with a wire winch, click type, which is lockable into suitable positioning of net. Maximum tensioning of wire winch is 150 kg.

The cart is made from stainless steel and painted for added corrosion. The cart is delivered with a net but can also be purchased without the stop net.

The net is 27 m long and 2,5 m high and installed, lose-hanging, onto a 27 m long rope.

See our website for related products.

Advantages:

- High capacity cart – for 27 x 2,5 m netting
- Popular Stop Net solution
- Storage solution for stop net
- Movable cart (observe safety)

Product Information

Cart Material: Stainless Steel 316L
- painted with a white protective anti-corrosion paint

Cart Height: 2,5 m

Cart Weight: 60 kg without net

Rope for net: 27 m

Wire-winch, click system, lockable, with a maximum capacity for tension of 150 kg.

Wire for counter-weight is 5 m with eyelets both ends.

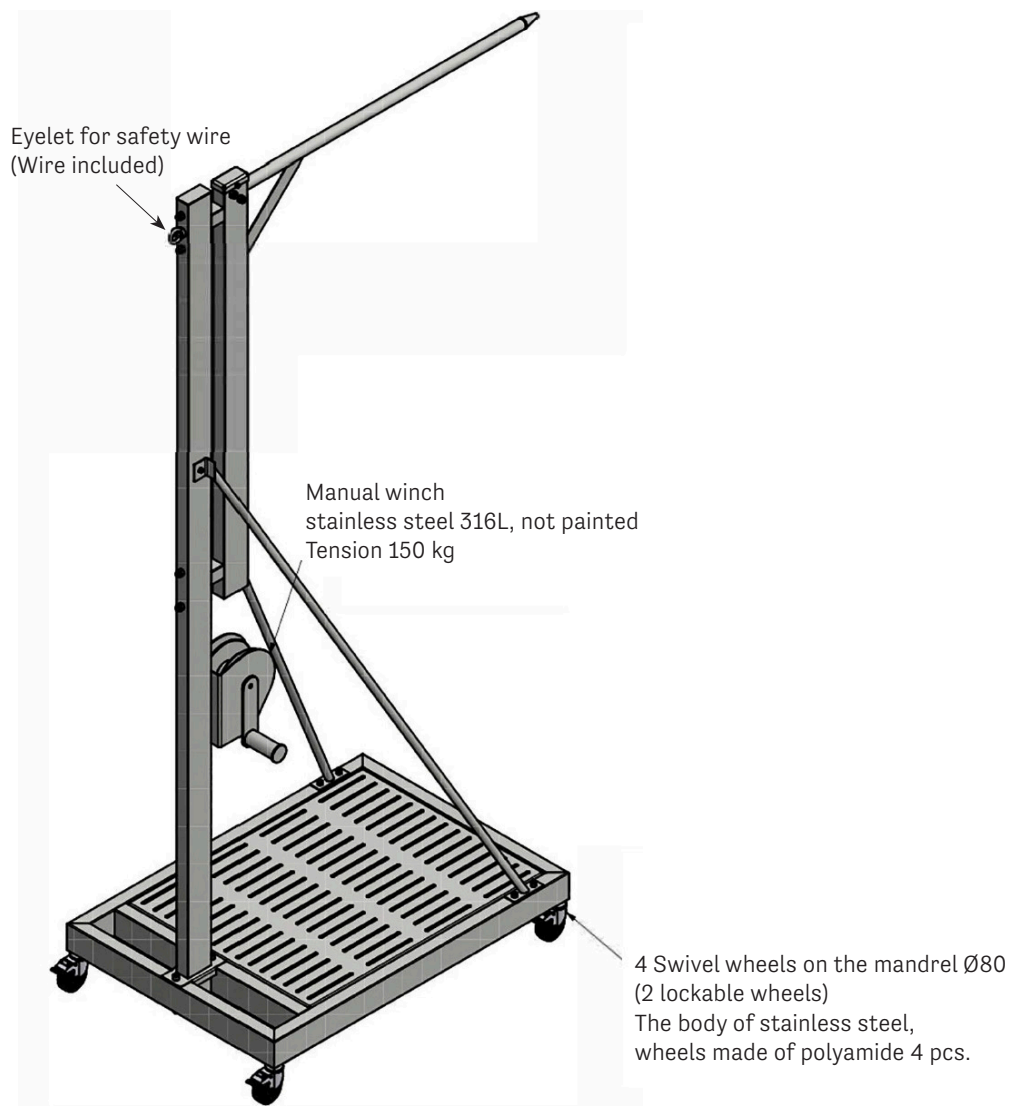

Cart is equipped with 4 wheels; 2 lockable.

Stop Net: Net is 27 m long and 2,5 m high. Net weight is 5 kg. The net is made of PP M100.

Safety instructions must be followed and planned before purchase. It is important to plan for proper and safe use and storage.

Selected When it Counts

Technical Information

Safety Instructions

Important: When using the cart it is crucial from a security point of view to consider the following:

1. The cart is delivered with a net 27 x 2,5 m in dimension. This net, opposite end of cart, has to be affixed onto something.

Alternative fixing of net:

- Wall hook in position 2,5 m up
- Post with eyelet in position 2,5 m up and with support "legs". Post should be placed in permanent floor anchor.
- Cart (without net) in opposite position.

2. Locking wheels of cart when in position.

3. Affixing of the counter-weight wire (safety wire) in back of cart. Cart is sold with a safety wire of 5 m.

Alternative fixing of counter-weight wire:

- Onto multi-purpose anchor, 2010003, positioned 2,5 m (for optimal stability) in the back of the cart.
- Onto wall anchor in the back of the cart.

Important: When storing the cart ensure that it is supported so that it may not fall over and hurt someone or something. Secure storage by affixing counter-weight wire onto a wall fixation.

Care and Usage Instructions

- After using the product it is required to wash it with tap water and let it dry before placing it in a storage room. Only light detergents like dish soap can be used for cleaning. Alcohol-based detergents might damage the cart.
- It is recommended to dry the cart with paper towels or microfiber cloth.
- It is required for the cart to be stored in a dry area, preferably in a separate, well ventilated area.
- If any atypical signs are noticed (for instance squeaky noises, missing elements, or visual damages) immediately stop further usage of the equipment and report the problem to the manufacturer or its authorized distributor.
- All portable devices must be installed and operated only by designated and trained personnel.
- It is important to thoroughly hose down the net with fresh water to remove salt, chlorine, and any other pool chemicals before storing.
- It is recommended to let the net dry before placing it in a storage room.
