

Storage Trolley Classic & Gold

The storage solutions of your racing lane lines will make a difference in how long your lane lines will last.

When lane lines are brought out of the pool water; keep them on a trolley or in a lane rope trap.

Rinse them with fresh water, keep them out of direct sun light and in a well ventilated area.

Do not drag them on the pool deck.

The Malmsten Storage Trolley is an easy to use hand wheels design allowing an excellent grip.

This is a durable and commercial sized trolley and made for the tough public pool environment and available in two convenient sizes.

Each trolley is equipped with four swivel castors for ease of handling. Two castors are lockable in position when trolley is being loaded, unloaded or in storage.

Shipped unassembled, with easy to follow assembly instructions.

A protective cover is available and sold separately.

Sold Per Unit

Useful information

- Maintain storage trolley to get the longest life possible.
- Follow installation instructions. Lock castors when rolling up lanes and when in a storage position.
- Retighten bolts on a weekly basis (including bolts of castors). Rinse with clear water on a weekly basis.
- Store the trolley, with or without lanes, in a dry, well ventilated storage area. Preferably out of direct sunlight.
- Tighten wheels - stain steel regularly.
- Attention to that stainless steel parts may react to contact with other metals. Immediately remove any start to rust with soft cloth. Wax surface for prevention.
- Repaint any scratches in the painted area (contact us for information on recommended paint)
