

## Pool Ladders of Stainless Steel

Art. No. 2013003

We design and manufacture custom pool stairs tailored to your specific requirements. Available with a fixed-height design or articulated steps for Malmsten Movable Floors. These steps automatically adjust to the movements of the movable floor, ensuring they remain perfectly horizontal at all times. Each stair is built from Ø 40 x 2 mm tubes and square profiles, featuring sandblasted, patterned, non-slip steps for maximum safety and durability. When constructing or renovating a swimming facility, compliance with current accessibility regulations is essential to ensure usability for all.

### Advantages:

- Stainless, acid-resistant steel for maximum durability
- Custom-designed stairs to match the pool's layout
- Non-slip steps and robust construction
- Can be manufactured with fixed height or articulated steps for movable floors
- Complies with current accessibility requirements for all users
- Suitable for both new construction and renovation of swimming facilities

### Product Information

**Material:** Made of stainless, acid-resistant steel, grade EN 1.4404/316L

**Dimensions:** Custom-made to fit your pool

**Step Options:** 3 to 10 steps, depending on the distance from the pool deck to the bottom

**Important:** To meet safety requirements, one or two "safety guards" must be installed on the sides of the stairs. These guards are custom-made.

All potential equalization requirements and any associated recesses or clearances necessary to eliminate unintended electronic currents (micro-currents) will be discussed and finalized during the design phase.

**Delivery Time:** Approx. 10 weeks
