Do you want to get rid of fine lines and wrinkles? I found out about the **MyoGlow** Neck Lifting Device from My Derma Dream not long ago. They say it works well to make skin tighter. Since I was interested, I chose to test how well it worked myself.

In this review, I'm going to talk about my experience with the device, focusing on the good and bad things about it so that you can make a good choice.

## Myoglow Neck Lifting Device: A Review

**MyoGlow** says it can make your face look younger without the need for makeup or surgery. This device is easy to use at home and can make skin look younger in four different ways, making it easier to lift, shape, and strengthen. Each unit comes with a USB charging wire and a guide that tells you how to use it.

The gadget says it gives the following benefits:

- Get a natural lift without having to use needles.
- Add depth to your face without using a lot of makeup.
- To make your face look more defined, highlight your cheeks.
- With exactness, show off your best features.
- Define your chin to make your look more polished.
- Reduce swelling to make yourself look younger.
- Help get rid of wrinkles and make the face smoother.

## How does the MyoGlow device work?

Light Magic Therapy is used by the **MyoGlow** gadget. This lets light waves go deep into your skin and refresh you at the cellular level. The RED LIGHT fights the effects of getting older, the BLUE LIGHT gets rid of acne bacteria, and the GREEN LIGHT makes your face look less puffy and more shaped and slims it down. Then, it uses a needle-free way to get active

ingredients deep into your skin, which makes cell walls less resistant and opens pores so that the serum can mix with your skin.

**Testing the MyoGlow System:** It took only 7 days for the [MyoGlow](#) system that I bought from [shop.mydermadream.com](http://shop.mydermadream.com) to get delivered. The guide that comes with it says to put it on your neck, cheeks, and forehead. A good way to avoid annoying electro-tingling feelings when the tool doesn't move smoothly is to fully prime the whole area first.

Luckily, it didn't take long to learn. I added it to my sleep routine and set it to the highest level within a week. But the breaks between parts to put on the primer made it take longer. Each repetition only lasts five seconds, but the process lasts a little longer than the stated five minutes because of the breaks and primer. This makes sure that it is a comfortable experience.

After using it for 30 days, I saw good changes. My wrinkles still haven't gotten any better, but my forehead feels firmer, and the lines around my mouth, brows, and lips look better. The [MyoGlow](#) system is definitely worth buying, even though it might take some time for effects.

## MyoGlow Benefits:

- **Things You'll Like About This Neck Lifting Tool**
- **Within thirty days, the face gets firmer.**
- **In the long run, it could have a good effect.**
- **The lines around the mouth look a lot better now.**
- **MyoGlow Cons: Things to Worry About**
- **No wrinkles have appeared yet.**
- **It's important to know that this won't work right away; you have to use it all the time.**

## Does MyoGlow Really Work?

It's true that [MyoGlow](#) works, but keep in mind that it doesn't work right away or in as little as five minutes. Some people may feel like their skin is tighter and their face is more molded right after using MyoGlow. This could be a placebo effect, so it's important to keep that in mind. In reality, it could take a few days or weeks for effects that you can see to show up.

## Myoglow Reviews and Key Information

**MyoGlow** has an amazing 4.8 rating on Trustpilot, but there have been some complaints on BBB and Reddit about delays in product shipping due to restocking.

I recently bought a My Derma Dream face massager online. Sadly, it took more than a month for the tool to get to me. When it got here, I carefully followed all of the steps, including charging it overnight. Even though the lights and sounds showed that it was working, the machine itself did not respond. I tried to get a return by emailing the company several times, but instead of help, I was told to try fixing things myself. Even after all of the

fixing steps were taken, the unit still won't work. Sadly, the business hasn't replied to my follow-up emails and won't give me my money back.

It's important to keep in mind that the customer has taken back the complaint and the company has fixed the problem. Because of this, there are no people who are still unhappy.

## How to Use

**Cleaning the skin:** Start by washing your face softly.

**Serum Application:** Use your choice activator serum.

**Power Activation and Mode Selection:** Switch on the device and pick a treatment setting that you like.

**Effortless Application:** Move the device over your face, jaw, and neck in an uplifting action.

## Does the Myoglow device have any side effects?

Some people have said that they felt light tingling, discomfort, skin irritation, or dryness after having a microcurrent facial. Also, some people said they felt dizzy, tired, or had twitches in their faces.

## Myoglow Neck Lifting Device's Safety

The [MyoGlow](#) Neck Lifting Device is thought to be safe because it uses very little electricity to work. But, you should not use the device if

**Pregnant:** It's not clear how the baby will be affected, so it's best not to use it when pregnant.

**Pacemaker Ownership:** People with pacemakers should not use microcurrent tools because of possible problems with electrical energy, though these are not common.

**Epilepsy Diagnosis:** People with epilepsy should not use microcurrent tools until more study is done on how they might affect people with epilepsy.

In short,

**MyoGlow** is easy to use and works very well. In 30 days, my face became firmer. Even though there are still wrinkles, my brows, lips, and the lines around my mouth look better. But keep in mind that MyoGlow is not a quick-fix option.
