

## USE AND MAINTENANCE

Reference	Type	Description
7225V	GREEN	GREEN recessed manhole, in metal sheet th. 30/10, c/w frame. Hot-dip galvanized, RAL 7035 PPC finishing.

## INSTALLATION

**INSTRUCTION:**

Installation must be carried out by expert personnel equipped with suitable equipment for lifting heavy loads.

If the manhole cover weighs 30 kg or less, it can be moved by hand, though the assistance of two operators is recommended.

- 1 - Make sure that the installation surface is intact and capable of withstanding the load to be applied on it.
- 2 - Dig a hole in the lawn measuring roughly 20 cm in diameter around the sump unit and level with the latter.
- 3 - Place the frame of the manhole cover on the sump unit and centre it on all 4 sides.
- 4 - Use soil to fill the sides of the frame and compact it.
- 5 - Fill the bucket of the manhole cover with a layer of non-woven fabric, covered with a layer of gravel (2÷3 cm) and, lastly, with clayey-sandy or soft-sandy soil.

**ADVICE:**

In case of sump units for collecting waste water, it is advisable to install hot-dip galvanised and coated manhole covers, due to their greater resistance to corrosion by aggressive organic and inorganic substances.

**WARNINGS**

- Strictly observe all the manufacturer's instructions described in this document.
- Do not use the product in ways other than those for which it was intended.
- Do not in any way tamper with the product or any other component.
- Make sure that the product has no structural defects; if it does, immediately notify the supplier.
- Make sure that the type of item matches that requested by the designer.
- Be careful not to damage the surface treatment of the steel product or any of its components.

**MAINTENANCE**

MAINTENANCE SHOULD BE CARRIED OUT AT LEAST ONCE A YEAR

- 1 - Remove the bucket.
- 2 - Clean the inside of the frame by removing any debris, leaves, stones, gravel, etc.
- 3 - Put the bucket back in place.

**DISPOSAL**

Regarding disposal, consult the applicable regulations for recovering any materials compatibly with the environment, and observe all local regulations.

Moreover, we recommend contacting a specialised waste disposal company.
