Founder & CEO: **Mel Suntal, Founder & CEO**

Media contact: press@axonallglobal.com

Website: **axonall.com**

Press hub: **news.axonall.com/press**

What is Axonall?

Axonall creates transformation-led luxury journeys built around the shift a traveler is seeking –stillness, renewal, reconnection, vitality, or bold expansion. Travelers can plan and book vetted hotels and experiences directly on Axonall, while private aviation is available via request-to-arrange.

What makes Axonall different

- **Transformation-led, not destination-led:** Axonall is built around the *shift* a traveler wants to experience (stillness, renewal, reconnection, vitality, bold expansion), not just where they're going.
- **A proprietary framework, not generic personalization:** The Transformation Arcs are Axonall's seven signature journey paths, a psychology-informed framework that gives personalization structure and coherence, not just "recommended for you" lists.

- **Understands more than stated preferences:** Axonall personalizes using what travelers explicitly share (dates, budget, style) plus conversational cues (what they emphasize, avoid, and prioritize) to make results feel uniquely individual, and fast.
- **Journey Artisan:** A human layer is important aspect of our service promise and Journey Artisans and our 24/7 support team available to serve.
- **Conscious luxury built in:** Carbon Wallet integrates emissions tracking and response for hotels and experiences, so sustainability is considered part of the booking process, not an afterthought.

How it works

- 1) **You tell us what you want** (destination, style, budget)
 - 2) **We pick up the cues** (tone, language, what you focus on)
 - 3) **We interpret this data** and recommend a personal journey path (your Transformation Arc)
- **Instantly individualized options you can book**

The Transformation Arcs Explained (seven signature journey paths)

- **Stillness** – reset, quiet restoration
- **Flow** – ease, rhythm, lightness
- **Vital Line** – energy, strength, aliveness
- **Unbound** – expansion, reinvention, boldness
- **Belonging** – connection, culture, reunion
- **Echelon** – peak luxury, precision, access
- **Beyond** – frontier, rare, once-in-a-lifetime

What travelers can book on Axonall (as of January 2026)

- **Hotels:** bookable directly
- **Bespoke Experiences:** bookable directly

- **Private aviation:** request-to-arrange (transitioning toward instant quotes/booking as the product evolves)

Sustainability

Axonall integrates a Carbon Wallet layer for hotels and experiences, helping travelers track and address personal emissions as part of the booking journey.

Fun Fact

Travel isn't just about going to places. It's about what you get out of it. As Mel says, "The best trips are the ones that change you from the inside out."

About Axonall (Boilerplate)

Axonall creates transformation-led luxury journeys built around the shift you're seeking. Powered by an AI concierge, travelers can plan and book vetted hotels, experiences, and private aviation. The seven signature Transformation Arcs instantly individualize each trip using stated preferences and conversational cues, so every journey delivers a real internal shift. Committed to conscious luxury, Axonall integrates the Carbon Wallet to track and address emissions, helping travelers choose with intention.

Tech press variant (one-line add-on): Axonall's AI concierge is built on agentic AI that personalizes in real time using preferences and conversational context.

Terminology Box

Transformation-led luxury travel

A way of planning travel around the *shift* a traveler wants to experience (e.g., renewal, reconnection, vitality), not just destination.

Transformation Arcs

Axonall's proprietary framework of seven signature journey paths used to shape and explain the intent of a booking (such as hotel, experience, or full trip) so the journey feels coherent and outcome-led.

Journey Path

A personalized booking, expressed via a Transformation Arc (pace, atmosphere, experiences, and property style).

AI Concierge

Axonall's conversational planning interface that helps travelers plan and book. It personalizes in real time using stated preferences plus conversational context.

Agentic AI (tech press term)

The underlying approach behind Axonall's AI Concierge: systems that can interpret inputs, take steps toward an outcome, and adapt recommendations dynamically.

Journey Artisans

Axonall's human refinement layer used when deeper tailoring, rare access, or extra support is desired (not required for booking).

Carbon Wallet

Axonall's integrated tool for hotels and experiences that helps travelers track and address emissions as part of trip planning and booking.
